

# Why is HEARING HEALTH

## So Important?

Ear Disease is serious; it can lead to loss of hearing forever.

**BUT THERE  
IS GOOD NEWS!**

Ear Disease  
can be prevented  
and treated!

**AVAILABLE  
FOR EVERY  
(CHILD!)**

Carbal is pleased to announce that this service is now non-exclusive and available for all Indigenous and non-Indigenous children at your school.

For a small fee of \$25, your student will receive an initial hearing assessment and if required, a follow-up assessment.

Our child health worker will be happy to explain how the program works in more detail.
